

Production And Export Of Pure Seed Is Becoming An Important Industry In Canada

Canada is making very marked progress in the production of pure seed, and the annual meeting of the Canadian Seed Growers' Association, which closed last week in the city of Montreal, has shown that the industry is now well on its way to becoming an important one in the country. In 1932 there were registered about 1,000 seed growers in Canada, and in 1933 there were registered about 2,000. The total production of pure seed in 1933 was valued at over \$1,000,000. The total production of pure seed in 1933 was valued at over \$1,000,000. The total production of pure seed in 1933 was valued at over \$1,000,000.

papers are in too strict marking by
those who read them.
Obviously, however, the test must
be made less difficult, or the average
intelligence of students must be
reduced by exclusion. It is worth
of course to make such a test, but
failure in high schools. In elementary
schools they are acquiring the
minimum of education required
for citizenship. In the schools
they are doing something different.
They are beginning their preparation
for leadership, and hence for
business life. It is 75 per cent. of
those who wrote Grade XI and
Grade XII examinations this year
were practically failures, though it is
clear that the community is throwing
away most of the money it
spends in education. It is the
other hand, the 75 per cent. are,
really being educated and have only
failed because of the excessive
difficulty of the examinations, then the
purpose of the community has been
frustrated by the pedagogues who
make the examinations easy.

No matter which way you look at it,
there is something wrong. Speaking
in practical terms, what the
figures given in the first paragraph
mean is that more than half the
money spent on high schools in
Saskatchewan during the 1931
session was wasted and that several
thousand aires and boys have been
discouraged from further efforts to
educate themselves professionally.

ALBERTA'S RAILWAY TANGLE

In spite of the utmost effort on the
part of Premier Gething and his
cabinet, it has been impossible
for the government to negotiate a
satisfactory deal for a new lease of
the E. D. and B. C. Railway in the
Peace River.

The attitude of the Royal Bank,
as holders of the common stock of
the railway, has been a major
obstacle to the government. The
owners of the line, in refusing con-
sent to any lease of the line, has
blocked any further efforts of the
government making a deal with
the C.P.R. or the C.N.R.

This was referred to the Legisla-
ture by the premier when he read
a statement reviewing the entire
history of the road and his negotia-
tions for a lease of the line. The
operation of the line, and the
effect of the loss of the C.N.R. and
C.P.R., together with documents
showing the attitude of the Royal
Bank, the Royal Bank refused con-
sent to a lease of the railway to any
company. The government can
make no such deal without the con-
sent of the bank.

The bank wants the government
to insure by its securities in the
line for \$100,000.

The government refuses to re-
consider this, stating it believes it
is not in the interests of the pro-
vince to pay this sum.

The railway company will make
no offer to purchase the road, but
offer to lease it under conditions.

The bank wants to sell, and
family returned home. Thursday
last from a two weeks' visit at
Athabasca. They were accompanied
by Mrs. Sproule's sister, Mrs. W.
W. Sproule and baby.
